

## Case Study: Miraki Innovation

### Brown Rudnick's Fund Formation Team Works with Venture Capital Firm Dedicated to Healthcare Innovation

Currently in progress, Brown Rudnick is forming a fund for Miraki Innovation. Our fund formation team is a focused and coordinated group of attorneys who collectively understand the dynamic law surrounding fund formation.

Brown Rudnick has formed funds for MedCap Growth Equity, Miraki's predecessor, and has represented both MedCap and Miraki in connection with their relationships with investors and in their investments, including patent representation and structuring of portfolio investments.

This is a key capability that we can offer to our clients in the life sciences and healthcare sector. Some of our partners have over 30 years of experience in fund formation and have formed scores of funds and families of funds throughout the world. With this broad input of knowledge, we can avoid complications, structure deals that address big-picture visions, and drive strong results.
